Gunvante, The main object of this booklet is to help the physician to understand the state of mind and disposition of the patient. A few illustrative cases are given to show how the method can be put into practice. In view of the fact that many students complain of getting confused when 'taking the case', the authors felt the necessity of outlining how to elicit the other symptoms which complete the 'totality of the case' such as the physical generals, causations, concomitants, the peculiar, uncommon and characteristic symptoms (sometimes called keynotes).

Reviews

Extensive information for book fans. It is written in basic words and never hard to understand. It is extremely difficult to leave it before concluding, once you begin to read the book.

This publication is great. It is full of wisdom and knowledge. You will not really feel monotony at any time of the time (that's what catalogs are for relating to when you ask me).
